

1. Head Piece

Attach the two skull pieces to the plate shown

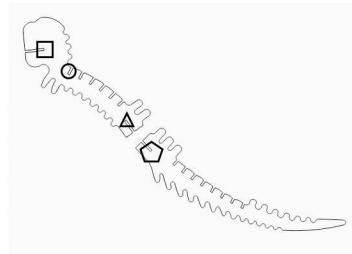

2. Main Body

Attach the shown pieces as indicated. If done properly, piece D will attach to pieces B and C underneath piece A

3. Upper Body

Assemble as shown

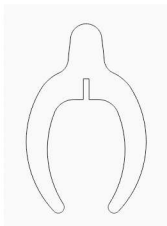

4. Upper and lower spine

1. Connect the main body to the upper and lower spine, matching the shapes
2. Attach the head to the upper spine as indicated by the square
3. Attach the Upper Body as indicated by the circle

5. Finishing Up

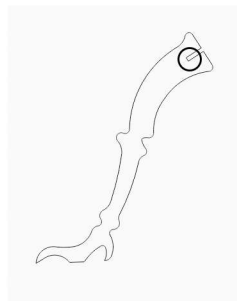

1. Attach the remaining rib pieces to the upper spine, from largest to smallest
2. Attach the lower bone pieces to the lower spine tail, from largest to smallest
3. Attach the forward facing leg to the right side of the main body (circle)
4. Attach the remaining leg to the left side of the main body (circle)
5. Attach the 2 remaining pieces to the underside of the main body (square), with the "hammer" shaped end of the bones facing forward towards the front of the model
